GOOGLE SHEET OR EXCEL EXPERIMENTS

EXPERIMENT - 10

AIM:

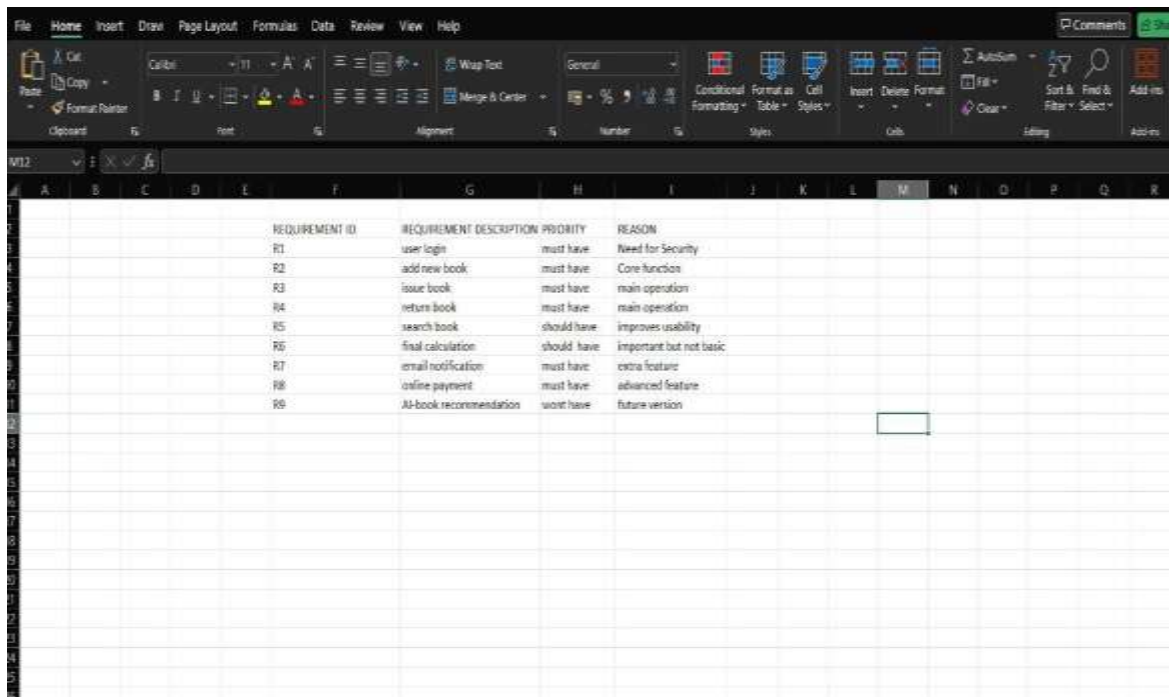

Use the following requirements for a Library Management System:

- Add a feature to search books by title and author.
- Implement an online book reservation system.
- Generate monthly reports on borrowed books for administrators.
- Enable email notifications for overdue books.
- Add support for QR code scanning for borrowing and returning books.
- Create a user-friendly dashboard for librarians.
- Allow users to review and rate books.
- Integrate a chatbot for user assistance.
- Develop a mobile app version of the system.
- Provide multi-language support.

Categorize each requirement using MOSCOW Method (Must-Have, Should-Have, Could-Have, or Won't-Have) based on the following criteria:

- Impact on the users and stakeholders.
- Feasibility considering time, budget, and resource constraints.

Finally Submit the completed Google Sheet or Excel file with all requirements categorized and justified.

Requirement ID	Requirement Description	Priority	Reason
R1	user login	must have	Need for Security
R2	add new book	must have	Core function
R3	issue book	must have	main operation
R4	return book	must have	main operation
R5	search book	should have	improves usability
R6	final calculation	should have	important but not basic
R7	email notification	must have	extra feature
R8	online payment	must have	advanced feature
R9	AI-book recommendation	won't have	future version
